

Sustainability Policy 2024

Sustainability Policy

As a company we accept the role of being a sustainable Airport and are committed to doing all we can to minimise the operational impact of our Airport on the environment wherever possible. To achieve our vision, we plan to grow our business so we can build economic growth through sustainable revenue and continue to support and educate our community and stakeholders.

Our core goals below outline how we will accomplish this:

Sustainability Objectives

SOCIAL

The Airport's Social Sustainability goal is to continue to educate and support the local community by:

- Maintaining and enhancing our relationships with local iwi
- Educating staff and terminal tenants about environmental sustainability
- Supporting local NPDC and community initiatives

ENVIRONMENT

The Airport's Environmental Sustainability goal is to continue to monitor and minimise our environmental impact by:

- Committing to reduce our Scope 1 & 2 Carbon Emissions by 30% by end of 2024 from 2018 (base year)
- Committing to reaching Airport Carbon Accreditation Level 3 by 2025.
- Continuing to develop our Wildlife Hazard Management Plan to align with the Predator-Free Taranaki Programme
- Committing to using environmentally conscious suppliers

FINANCIAL

The Airport's Financial Sustainability goal is to build economic growth with revenue generated by:

- Striving to be financially self-sustaining post-COVID.
- Supporting local and regional businesses and partnerships
